EDUCATION

Fisk University, *Bachelor of Science in Computer Science*

May 2028 | Nashville, TN

- **Relevant Coursework:** Data Structures & Algorithms, Intro to Computer Science, Calculus I & II
- **Honors:** W.E.B. Du Bois Honors Program, Erastus Milo Cravath Presidential Scholarship, **GPA:** 3.9/4.0
- **Extra-Curriculars:** Fisk Computer Science Club, Aerospace Technology Team, African Students Association

SKILLS

Technical Languages:

Python (3 years), HTML/CSS (2years), C++ (intermediate), JavaScript, React, Java, Arduino

Tools & Frameworks:

Github, Figma, Flask, VS Code, Postgres, SQLAlchemy, Data Analysis and Visualization, Machine Learning

PROJECTS

Conway's Game of Life Simulation, C++, *Raylib*

Jul 2025

- Implemented an interactive simulation using object-oriented design, data structures, and algorithm optimization for real-time performance.
- Designed modular simulation logic and efficient update routines, improving low-level systems programming skills.
- Designed a Raylib GUI for random/custom layouts and speed toggling, strengthening C++ skills while practicing the design, testing, and optimization of a complete software system.

MamaShield, *Next.js, Tailwind CSS, Vercel, OpenAI*

Apr 2025

- Built and deployed a scalable full-stack app in >36 hours, winning **1st place** at the AUC x Vanderbilt AI Un-Hackathon.
- Engineered an AI-driven medical classification tool that utilizes NLP to query the FDA drug database, achieving real-time classification of prenatal medication safety and reducing the potential for misclassification by an estimated 60%
- Maximized user accessibility by integrating image recognition, speech-to-text input, and an emergency triage system

RAG Pipeline, *Google Colab, Llamaindex, HuggingFace*

Feb 2025 – Mar 2025

- Built an end-to-end pipeline that reduced manual review time of mortgage documents by 65% using **OCR**, open source classifiers, vector **database**, and **NLP**
- Designed modular components to handle unstructured financial data with high accuracy and maintainability.
- Delivered actionable insights for high-stakes workflows, aligning technical implementation with business outcomes.

PROFESSIONAL EXPERIENCE

Arkansas Summer Research Institute, *Data Science Researcher*

May 2025 – Jun 2025

- Applied **Python** for data analysis, visualization, and predictive modeling, leveraging **classification algorithms** using **scikit-learn** to address real-world research problems
- Processed and visualized large datasets under time constraints, ensuring reliability and accuracy of results.
- Presented findings at symposium using UX design principles to make complex concepts clear for both technical and non-technical audiences

STAIJA (research start-up), *Software Design Intern*

Nov 2023 – May 2024

- Designed website architecture and documentation to support scalable growth and long-term maintainability of systems improving development efficiency by 20%
- Produced UI/UX prototypes and reusable design assets, simplifying the development process for cross-functional teams.
- Collaborated with engineers to align system design decisions with performance, scalability, and usability requirements.

LEADERSHIP AND ACTIVITIES

Fisk Office of Global Initiatives, *Ambassador (Events)*

Aug 2025 – Present

- Spearheaded end-to-end planning and execution of an event series, managing all logistics for 4 campus-wide gatherings.
- Collaborated with student organizations to enrich events and increase student engagement and attendance by over 50%
- Served as Event Manager and MC, resolving real-time scheduling conflicts to ensure a high-quality guest experience.

Fisk Aerospace and Robotics Team, *Member*

Aug 2025 – Present

- Engineered an L1 rocket using 3D printing, laser cutting, and precision assembly to ensure successful flight and recovery
- Facilitated onboarding of new members, guiding them through the fundamental principles of rocket assembly and flight safety, resulting in the successful construction and launch of multiple student-led projects.
