Jolaoluwa Amodu

CS (honors) @ Fisk || AI/ML @ Break Through Tech, Cornell Tech ||
3x hackathon winner
Nashville, Tennessee, United States

Summary

I'm a Computer Science major at Fisk University with strong interests in software development, automation, and artificial intelligence. I have hands-on experience using Python, ReactJS, NodeJS, and Java to build interactive and responsive websites and web applications. My passion lies in leveraging technology to create tools that solve real-world problems, streamline workflows, and automate business operations.

I've worked on projects in fields like Computer Vision, Artificial Intelligence, and workflow automation, combining technical knowledge with creativity and problem-solving. I enjoy working across the full stack and thrive in collaborative, fast-paced environments.

Currently, I'm seeking internships, fellowships, conferences, or competitions that will allow me to grow professionally and expand my network. I'm especially drawn to opportunities that challenge me to build impactful solutions with emerging technologies. If you're working on something exciting in tech, I'd love to connect and learn more.

Experience

ColorStack
Fisk Chapter Secretary
August 2026 - Present (2 months)
Nashville, TN

Fisk University
1 year 2 months
Office of Global Initiatives Ambassador
August 2025 - Present (1 year 2 months)
Nashville, TN

R.I.S.E. x GWC Protothon - Second Place Winners

March 2026 - March 2026 (1 month)

Nashville, TN

- Developed FortiFi, an AI-powered financial wellness platform designed to help young adults make smarter financial decisions through personalized guidance and long-term planning.
- Built a production-style prototype with Next.js, Tailwind CSS, and Google Gemini, showcasing AI-powered budgeting assistance, spending analysis, and financial goal visualization.
- Planned integration with the Plaid API to securely connect users' financial accounts and deliver real-time, data-driven recommendations.
- Collaborated on user experience and product strategy to address common financial challenges faced by Gen Z, including budgeting, emergency savings, and wealth building.

BASTA

Google x Basta Code2Career Cohort Member

July 2026 - Present (3 months)

- Received one-on-one mentorship from a Google Software Engineer, engaging in weekly deep-dives into industry-standard software engineering practices and career development.
- Accelerated career readiness by participating in top-tier employer exposure events, technical workshops, and evidence-based career assessments.

Adobe

Student Ambassador

June 2026 - Present (4 months)

AI4ALL

AI Fellow

May 2026 - Present (5 months)

- Selected for a two-semester AI accelerator, collaborating in nationwide teams to engineer human-centered AI projects focused on responsible AI practices, fairness, and data privacy.
- Prepped, trained and evaluated multiple models on ~1M credit card transaction entries to identify fraudulent transactions in financial institutions.

- Presented at a national virtual symposium to industry leaders and recruiters after completing 13 weeks of rigorous machine learning workshops.

Break Through Tech

AI/ML Fellow

May 2026 - Present (5 months)

- Earning a Machine Learning Certificate from Cornell University by analyzing real-world datasets and building robust data projects.
- Completed capstone project where I trained and evaluated 4 different model architectures on 32k entries of census data to enable financial institutions in underserved communities to classify users based on income levels
- Collaborating in AI Studio with industry mentors and advisors to solve real-world ML Challenge Projects.

Bloomberg

HBCU Academy of Excellence

August 2026 - September 2026 (2 months)

Alcon

R&D Extern

August 2026 - August 2026 (1 month)

Fort Worth, TX

Arkansas School for Mathematics, Sciences, and the Arts

Arkansas Summer Research Institute Student Researcher

May 2025 - June 2025 (2 months)

- Completed an intensive research program at ASRI focusing on data science, research methodologies, and professional development.
- Gained hands-on experience in data analysis and visualization using Python, participating various tracks covering topics such as exploratory data analysis, statistical analysis, and machine learning techniques.
- Developed strong research skills, including literature review, reference library management, experimental design, and understanding research paper structure.
- Participated in sessions on effective science communication, UX design for presentations, and giving compelling presentations, culminating in a research symposium.
- Enhanced professional development through workshops on LinkedIn utilization, resume/CV building, managing a data science portfolio, and career panels on STEM, grad school, and medical school opportunities.

- Participated in final student research symposium, with a presentation on my work in the program, including research question, hypothesis, methodology, results from statistical analysis (with visualizations) and conclusion.

AUC Data Science Initiative

AUC x Vanderbilt AI Un-Hackathon - First Prize Winner

April 2025 - April 2025 (1 month)

PwC

Workflow Automation Extern

February 2025 - March 2025 (2 months)

- Gained hands-on experience with Natural Language Processing (NLP) and Computer Vision USING Tesseract OCR.
- Learned how to classify mortgage documents using AI.
- Extracted valuable insights from large datasets using open-source AI models and embedding models.
- Worked with cutting-edge tools like Python, PyPDF2, pdfplumber, LlamaIndex, and Document AI.
- Built a complete RAG pipeline for document automation, classification and data extraction.
- Applied my knowledge to real industry problems and develop an AI-powered proof of concept.

Bloomberg

Bloomberg Tech Lab

February 2025 - February 2025 (1 month)

STAIJA

Web Designer

November 2023 - May 2024 (7 months)

I worked with the team to design the website from scratch using Figma. We progressed from wire-frames to sitemaps and then the content for individual pages. At each stage, we developed multiple prototypes, determined the best course of action, while picking important features from each one to create the best result.

University of Lagos Engineering Society

Drone Design and Programming Participant

January 2024 - February 2024 (2 months)

Lagos

- Selected to participate in a drone programming training in Python
- Programmed drone movements by integrating Pygame to map keyboard inputs, enabling three degrees of freedom.
- Implemented computer vision features using OpenCV, including face detection and object tracking for autonomous movement.
- Gained hands-on experience with drone hardware by learning key components, assembly processes, and operational mechanics.
- Designed a Tkinter-based desktop interface that integrated live video feed, face tracking, image capture, and battery status monitoring, enabling more efficient drone control

Viva Aerospace

Freelance Writer

September 2023 - February 2024 (6 months)

I researched on new and innovative developments in the aerospace industry and crafted articles to break these innovations into easy-to-read articles that the audience could use to keep up-to-date with the aerospace industry. The resulting articles passed across all the needed information without overwhelming readers with unnecessary and confusing information.

Education

Fisk University

Bachelor's degree, Computer Science · (July 2024 - June 2028)

CodePath

CYB 101: Intro to Cybersecurity Course, Cybersecurity · (September 2025 - November 2025)

International School, University of Lagos

High School Diploma, Engineering Technology, General · (September 2015 - October 2021)
